

Faculty of Economic and Social Sciences

IMPORTANT NOTES

If for one subject you can find several different types (lecture, practice, laboratory) of courses then please choose one and only one course from each type in order to be able to perform the subject's requirements successfully. Civil Engineering courses are on the website separately. Courses chosen from the offer of Faculty of Civil Engineering will be checked and arranged individually by the departmental coordinator.

Subject code	Subject name		Requirement	ECTS credit
BMEGT20A001	Management and Business Economics		Mid-semester mark	4
Course type	Course code	Course language	Timetable information	
Lecture	ER	English	MON:08:15-10:00(KF81); WED:14:15-16:00(KF88);	
<p>The course introduces the essentials of management as they apply within the contemporary work environment and gives a conceptual understanding of the role of management in the decision making process. Particular attention is paid to management theories: principles of management, marketing management, quality management, production and project management. For problem formulation, both the managerial interpretation and the mathematical techniques are applied. Budapest University of Technology and Economics Faculty of Economic and Social Sciences Course Syllabus and Requirements Management and Business Economics 2. Course code Semester Hours per week (Theory/Practice) ECTS credits Language of Instruction Level (BSc/BA/MSc/MA) BMEGT20A001 fall/spring 4/0 4 Hungarian BSc/BA 3. Course supervisor (name, title, department): János Kövesi, dr. Habil, Professor, Department of Management and Business Economics 4. Lecturers: Name: Position: Department/Institute/availability (Room, e-mail address): Szilvia Bíró-Szigeti, PhD Associate Professor Dept. of Management and Business Economics, QB305, szigetisz@mvt.bme.hu János Kövesi Professor Dept. of Management and Business Economics, QA315, kovesi@mvt.bme.hu Noémi Kalló, PhD Associate Professor Dept. of Management and Business Economics, QA308, kallo@mvt.bme.hu Tibor Szabó, PhD Assistant Professor Dept. of Management and Business Economics, QA317, tiborszabo@mvt.bme.hu 5. Preliminary knowledge required: Basic concept of companies and their operation. 6. Academic prerequisites: - 7. Objectives and description of the course: The course introduces the essentials of management as they apply within the contemporary work environment and gives a conceptual understanding of the role of management in the decision making process. Particular attention is paid to management theories: principles of management, marketing management, quality management, production and project management. For problem formulation, both the managerial interpretation and the mathematical techniques are applied. 8. Teaching methods: Lectures. 9. Requirements and assessment: 4 midterm exams have to be taken during the semester. The grade will be determined by the sum of the midterm exams (4x25=100 %), there are no minimum requirements for the individual exams. 10. Exams, make-up duties and make-up exams: Maximum 3 of the 4 midterm exams can be repeated or make up at the end of the semester. There are no final make-up exams in this course. 11. Office hours: By making appointment with the lecturers. 12. Course material, compulsory and recommended readings: Materials provided by the lecturers: www.mvt.bme.hu/segedanyagok 13. Workload and detailed class schedule: Topics to be discussed, readings required for the class, other assignments Week 1 Marketing management: Creating Customer Value and Engagement Week 2 Consumer behaviour, Analyzing the Marketing Environment Week 3 Market research, Product and brand management Week 4 Service management, Promotion management Week 5 Communication management, Online marketing Week 6 Quality management: Principles of quality management, the brief history of quality management systems Week 7 Overview of quality assurance systems based on ISO 9001:2000 Quality Management System. Week 8 Overview of quality assurance systems based on Total Quality Management System. Week 9 Production-economics: production systems, manufacturing models, product-process matrix. Week 10 Inventories, inventory control systems, costs of carrying stocks Week 11 Principles of management: Resources of a firm, firm as an organization. Week 12 Functions of managerial processes Week 13 Corporates strategies, Team work, communication in an organization. Week 14 Repeat of midterms</p>

BMEGT20MW02	Management		Mid-semester mark	5
Course type	Course code	Course language	Timetable information	
Lecture	ER	English	FRI:12:15-15:00;	

The course is designed for engineering students who would like to have a better conceptual understanding of the role of management. The course introduces the essentials of management functions (planning, organizing, control and leadership) as they are applied within the contemporary work environment. Particular attention is paid to the planning and control function elements within the course.

Subject code	Subject name		Requirement	ECTS credit
BMEGT301924	Economics II.		Mid-semester mark	2
Course type	Course code	Course language	Timetable information	
Lecture	EN0	English		

The aim is to allow students to understand today's economic environment. After having finished the course, students should understand the key concepts of macroeconomics (e.g. national income, unemployment, inflation, budget balance, exchange rates and the balance of payments), master a basic set of tools of economic analysis and demonstrate the ability to apply them to simple practical problems.

Subject code	Subject name		Requirement	ECTS credit
BMEGT30A001	Micro- and Macroeconomics		Exam	4
Course type	Course code	Course language	Timetable information	
Lecture	A28	English	MON:08:15-10:00(KF87); TUE:12:15-14:00(KF87);	

Selected topics and analytical techniques in micro- and macroeconomics tailored for engineering students. Introduction to microeconomics. Some basic economic concepts and analytical tools. Scarcity: source of eternal struggle or the foundation of all economic systems? How does it determine everyday life, and what role does it play in the operation of businesses? Opportunity cost, sunk cost, normal profit. How does the product market work? Consumer choice: what are the options on the demand side, what are the goals of the consumer and how they are achieved? The forms and aims of businesses. Basics of accounting and finance. Cost and profit analysis. Competition and market systems. Introduction to macroeconomics. How does government policy interact with the decisions, profitability and life cycle of businesses? The main issues of macroeconomic study: gross domestic product, changes in the price level, unemployment ratio. Governmental policies: tools and effects. Fiscal policy: direct intervention to the life of the households and firms. Monetary policy: changes in the regulations, workings and major indicators of the financial market, and their effect on the households and firms. Economic growth and productivity. Issues of international trade: exchange rate and exchange rate policy.

BMEGT30N002	Industrial Organization			Exam	6
Course type	Course code	Course language	Timetable information		
Lecture	EN11	English			
<p>This course is about different theoretical approaches to the organization and institutions of a market economy. The of the course is to get students acquainted with the most recent theories of different market structures and to their potential applications to practical problems related to market strategy and market regulation. After having finished the course, students should understand the key concepts of monopolistic and oligopolistic markets, the ways companies play their strategic games under different market conditions and the role a government can and should play in correcting market failures. /* Style Definitions */ table.MsoNormalTable {mso-style-name:"Normál táblázat"; mso-tstyle-rowband-size:0; mso-tstyle-colband-size:0; mso-style-noshow:yes; mso-style-priority:99; mso-style-parent:""; mso-padding-alt:0cm 5.4pt 0cm 5.4pt; mso-para-margin:0cm; mso-para-margin-bottom:.0001pt; mso-pagination:widow-orphan; font-size:10.0pt; font-family:"Times New Roman",serif;}</p>

BMEGT41A002	Research Methodology			Mid-semester mark	2
Course type	Course code	Course language	Timetable information		
Lecture	ER01	English	WED:10:15-12:00;		
<p>The course aims at helping the students to create a conscious attitude towards the methodological tools and abstract notions of their own subject. We are going to examine the chief characteristics of scientific activity as well as the primary methodological norms of research. We will study the basic notions of scientific knowledge (what do we understand by knowledge, causal relationship, law of nature, what basic understandings of space and time can be identified), and we will also observe the different phases of scientific cognition (experience, making hypotheses and theories). We are going to examine the role mathematics plays in the sciences. Among the scientific methods we will treat separately the followings: experimenting, measuring, quantification, verification and falsification. We will examine when a theory can be seen as verified, confirmed and falsified, and which results confirm a given theory. During the course, we are gong to illustrate with historical and contemporary examples how the above discussed methodological rules have been put into practice.</p>

BMEGT41M004	Ethics for Engineers			Mid-semester mark	2
Course type	Course code	Course language	Timetable information		
Lecture	A0	English	MON:08:15-10:00;		
<p>The purpose of this course is to help future engineers be prepared for confronting and resolving ethical issues that they might encounter during their professional careers. It gives an overview of the moral problems engineers face in their different social roles, and it provides conceptual tools and methods necessary for pursuing those issues. Topics include engineering professionalism; social roles of engineers; ethical theories; ethical decision making techniques; social impacts of engineering, professional organizations; code of ethics of engineering societies. Case studies are discussed in a practice oriented approach. The primary goal is to stimulate critical and responsible reflection on moral issues surrounding engineering practice. /* Style Definitions */ table.MsoNormalTable {mso-style-name:"Normál táblázat"; mso-tstyle-rowband-size:0; mso-tstyle-colband-size:0; mso-style-noshow:yes; mso-style-priority:99; mso-style-parent:""; mso-padding-alt:0cm 5.4pt 0cm 5.4pt; mso-para-margin:0cm; mso-para-margin-bottom:.0001pt; mso-pagination:widow-orphan; font-size:10.0pt; font-family:"Times New Roman",serif;}</p>

BMEGT42A003	Environmental Management Systems		Mid-semester mark	3
Course type	Course code	Course language	Timetable information	
Lecture	28 EN	English	THU:14:15-16:00(KF82); THU:14:15-16:00(KF82); THU:16:15-18:00(KF82);	
The course covers the topics relevant to the protection of environmental compartments, environmental pressures and pollution in a global context. The course introduces the concepts, indicators and tools of environmental protection, and the environmental management systems (EMS) at enterprises and other organizations. EMS topics include the assessment of environmental aspects and impacts, environmental audits, reporting, environmental performance evaluation, life cycle assessment.				
Subject code	Subject name		Requirement	ECTS credit
BMEGT42A022	Risk Evaluation and Risk Management		Exam	3
Course type	Course code	Course language	Timetable information	
Lecture	22 EN	English	TUE:10:15-12:00(QA240);	
Monetary valuation of natural capital and the concept of sustainable development (weak and strong sustainability). The necessity to value natural resources: the problem of public goods and free goods, discounting (social discount rate) and externalities. The areas of application and methodological basics of environmental valuation. The concept and elements of Total Economic Value. A detailed overview of the methods of environmental valuation: cost-based methods, productivity approach, revealed preference methods (hedonic pricing and travel cost method), stated preference or hypothetical methods and benefit transfer. An introduction to risk management: definition and approaches of risk, corporate risk management techniques, corporate social responsibility. Cost-benefit and cost-effectiveness analysis, case studies.

BMEGT42MN05	Environmental Economics		Exam	5
Course type	Course code	Course language	Timetable information	
Lecture	14 EN	English	WED:14:15-16:00(QA240);	
The course unit aims to introduce the natural and socio-economic causes of the problems investigated by environmental economics. It introduces the fundamental interrelations between development, economic growth, progress and economic performance with sustainable development, and the global conflicts and responses that stem out of these. It also introduces the concept of externalities, and problems originating in imperfect ownership regimes. It explores the problem of valuing nature, and the concept of total economic value. Finally, it analyses the most widely-used methods and means of environmental regulations, through theoretical analysis and real-life examples.

BMEGT42MN06	Environmental and Regional Politics of the EU		Mid-semester mark	6
Course type	Course code	Course language	Timetable information	
Lecture	18 EN	English	MON:14:15-16:00(QA240);	
This course unit aims to introduce the evolution of environmental and regional policies, their strategic elements and changing tools, and their contemporary practices and key policy areas in the European Union. The course will introduce the basics of regional policy; its goals and interrelations with environmental policy, and the practical implications on Europe. It will highlight the development stages of regional policy in Europe, focusing on the key milestones and reform efforts in an expanding European Union. During the latter part of the semester, the course will introduce students to the fundamental concepts of environmental policy: its origins, nature and key stages of development. It will also focus on the EU's Environmental Action Plans, and the Sustainable Development

BMEGT42N000	Theory and Practice of Environmental Economics			Exam	4
Course type	Course code	Course language	Timetable information		
Lecture	19 EN	English	WED:14:15-16:00(QA240);		
<p>The subject is to present the most important principles of environmental economics, environmental policy and sustainability as well as to show some practical applications. The topics included: systems and relations of economy, the society and the environment, a historical overview of environmental economics, the concept, levels and different interpretations of sustainable development. Environmental policy from an economic perspective is also discussed: its definition and types, economic and regulatory instruments in environmental protection, their advantages and limitations. Theoretical approaches include the theory of externalities, internalisation of externalities, Pigovian taxation, the Coase theorem, environmental economics in a macroeconomic context, alternative, "green" macro-indicators (NEW, ISEW, GPI), monetary environmental valuation, the concept of total economic value and environmental valuation methods (cost-based methods, hedonic pricing, travel cost method, contingent valuation, benefit transfer). Environmental Policy in Hungary. Introduction to environmental economics. Nature conservation and natural parks. Energy policy: providing a safe and sustainable development strategy. European and Hungarian Sustainable Development Strategy. Sustainable consumption. Corporate Social Responsibility.</p>

BMEGT42N002	Regional Economics			Mid-semester mark	2
Course type	Course code	Course language	Timetable information		
Lecture	12 EN	English	TUE:14:15-16:00(QB105);		
<p>The aim of the subject is to introduce basic, actual regional economics and spatial planning theory as well as the EU and Hungarian practice. The topics of the subject include the roots of spatial planning in economic theory, including the theories of Thunissen, Weber and Louisch, the theory of central places, growth poles and growth centres and territorial division of labour (Ricardo, Ohlin). The structural funds of the EU are introduced in detail. Further topics include the types and history of regions in Western, Central and Eastern Europe, regionalisation, decentralisation and regionalism, rural development, the effect of agricultural policy on rural development and rural development in Hungary, urban development, historical overview, differences between Western and Eastern Europe. The main characteristics of infrastructure development are also introduced, as well as the types of borders, the significance of borders in regional development and cross-border regional co-operations. Finally, the financial instruments of regional development, advantages and disadvantages of various instruments, Hungarian practice, distribution of resources among regions, institutional background and the system, management and financing of Hungarian municipalities are presented.</p>

BMEGT431143	Sociology of Culture		Mid-semester mark	2
Course type	Course code	Course language	Timetable information	
Lecture	ENG	English	WED:16:15-18:00(E301);	
<p>SOCIOLOGY OF CULTURE The course introduces basic theories of the Sociology of Culture relating to identity, subcultures, cultural differences and ethnicity, as well as presenting and discussing their practical relevance. Throughout the term, we will critically examine the concepts of high, mass and subculture, as well as those of nation, tradition, and community. The aim of this critical inquiry is not the relativisation of the mentioned concepts, but the introduction of those processes of social construction that lead to the emergence, consolidation and at times (re) negotiation of these categories and the related values and emotions. Through such inquiry, we are aiming towards a more nuanced understanding of the social- cultural conflicts of today's globalised society by the end of the term. Beyond presenting relevant theories and literature, the goal is to discuss the practical relevance and applicability of the observations through examples taken from across the globe.</p>				
Subject code	Subject name		Requirement	ECTS credit
BMEGT43A002	Sociology		Mid-semester mark	2
Course type	Course code	Course language	Timetable information	
Lecture	Eras1	English	TUE:12:15-14:00(E504);	
<p>This course will give students an introduction to sociology by discussing a subject that concerns all of us: the global financial crisis and the ensuing Great Recession (or Slump) whose dire consequences continue to affect the world economy to this day. The objective is to equip students with the tools required to make sense of this crisis in its complexity. A further consideration, specific to engineering and economics students is that a sociological study of the Great Recession provides valuable insights into the social determinants of innovations, most prominently technological and financial. Learning about these issues will also help them develop a basic understanding of late capitalism. They will find that the major subjects in sociology like power, cultural values, violence, symbolic goods, anomy, collective action, etc. touch upon things that profoundly impact our lives without us being aware of their implications. The craft of sociology is to depart from conventional notions by asking hard questions about these things using the methods of rational inquiry.</p>

BMEGT43A066	The Cultural History of Recorded Music		Mid-semester mark	2
Course type	Course code	Course language	Timetable information	
Lecture	ENG	English	WED:14:15-16:00(E301);	
<p>Technology for recording, processing, storing and distributing information does not only influence access to cultural products (price, circulation, distribution channels). It also fundamentally impacts upon the formation on cultural canons and, on an individual level, the reception, interpretation and social use of cultural products. However, it would be wrong to assume a one-sided determinism, as neither the direction of technological development nor the speed of the spreading of new technology are independent from the cultural needs of a given society, or its economic and political conditions. The history of sound recording, encompassing more than one hundred years, illustrates this dynamics well. The theoretical perspective of the course draws on Cultural Studies, Media Theory, the Sociology of cultural production and consumption, as well as Popular Music Studies. Besides the technological history of sound recording, we will also look at the history and logic of the music industry, primary areas of sound archiving and collecting, and further cultural use relating to recorded music. We pay particular attention to avant-garde/experimental music that makes use of recorded music; digital pop music and DJ culture; as well as copyright debates relating to sampling and remixing.</p>

The course will introduce students to some major issues and problems in aesthetics and the philosophy of art. We will study a number of philosophical questions about the nature, the production, the interpretation and the appreciation of works of art. After studying the basic philosophical categories concerning art and artworks we will concentrate on specific aspects of the creation and appreciation of paintings, drawings, photographs, moving images, digital images, fictions, music etc. For instance, we will consider questions and arguments about bdquo;realismrdquo; with respect to pictorial works of art, about literature and fictional works, and about the understanding and appreciation of music. Although most of the course will be devoted to the analytic philosophy art, we will also examine issues concerning design practices and products.

Course type	Course code	Course language	Timetable information		
Lecture	ENG	English	WED:16:15-18:00(E301);		
Cultural studies developed at the intersection of a number of different disciplines and theoretical standpoints. The objective of the course is to introduce these theoretical roots and the current approaches, which have developed within the framework of cultural studies. One of the most important elements of the development of approaches within cultural studies is the critical reassessment of the positivist epistemological tradition according to which reality can be experienced and understood in a relatively unproblematic fashion. Another defining element of a large portion of work within cultural studies is its conceptualisation of culture as always political. According to this approach all texts are inherently political as they inevitably bear the marks of structures of power and are at the centre of struggles over meaning and signification. The problematization of knowledge structures and meaning has contributed to opening up the analysis of reading and consumption towards a sensitivity for the possible independent readings and interpretations created by readers, viewers and consumers based on their own social experience, acknowledging the fact that these readers, viewers and consumers are capable of resisting the dominant readings of different texts and can even construct counter-interpretations opposing the dominant ideology from within the very texts aimed at supporting those dominant positions.

36. History of Education and Technologies of Communication Neptun code: BMEGT51A017 (BSc/BA) Credit: 2 credits Responsible Department: Department of Technical Education Semester: autumn/spring This course introduces students to communication technologies and their influence on learning from a historical, theoretical and practical perspective. As the forms of and technologies of communication are constantly changing, their impact on society, on education, on our perception of time and space is too. The lecture will emphasize the theoretical models that are essential to new communication technology as well as the practical applications and implications of new communication technology on education. Starting from the pre-history and non-verbal communication, a number of new communication technology areas such as computer-mediated communication, Web 2.0, mobile society and gamification will be explored.

(Lifelong) Learning and Working Life Neptun code: BMEGT51A020 (BSc/BA) Credit: 2 credits Responsible Department: Department of Technical Education Semester: autumn/spring Emphasizing the development of independent problem-identifying and problem-solving skills by analysing the global labour market challenges. In the framework of optional exercises and self-controlled learning processes and by acquiring the steps of program planning concentrating on the field of technology, training orientation possibilities are granted to participants in their fields of interest. During the training period we will present the practical applicability and large scale practice orientation through theoretical knowledge, wide-range technological examples, case-studies and the analysis of changes. The participants of the course will gain the necessary knowledge and competences for understanding the importance of sustaining the lifelong competitive knowledge by making individual job and scope of activities analysis based on their own learning competences and methods. They will understand the problems of learning skills as life skills, a new type of human capital, networking, teamwork and working methods in the context of lifelong learning. What does not only surviving but being successful in the dynamically changing professional and global environment today mean? What does it mean: "to be locally engaged while visible globally", What does the New Deal of Lifelong Learning mean for the new generation. What are the key messages and trends after the World Economic Forum 2017/

BMEGT52V100	Fashion and the Psychology of Advertising	Mid-semester mark	2

Course type	Course code	Course language	Timetable information
Lecture	29e	English	

The course aims to have a look behind the scenes of the colorful and glamorous world of fashion and advertising. What we see at first glance is a huge industry where millions of professionals are pushing the machinery to play upon our instincts. We shall study the methods, reviewing the role of public relations, sales promotion, the role of the brands, and the templates and stereotypes used in the different media. The vast amount of knowledge piled up by behavioral sciences will help us answer the question why our basic instincts to imitate can be used and abused. Why is it that we are ready to spend billions on shampoo, new clothes, junk food, gadgets ... etc. hoping to buy identity. We will also reveal that the very nature of the social animal - the group - plays an even more decisive role in our preferences and purchases - introducing a variety of approaches from the basic theories of fashion (trickle down, cascade, herd behavior) to network theories. /* Style Definitions */ table.MsoNormalTable {mso-style-name:"Normál táblázat"; mso-tstyle-rowband-size:0; mso-tstyle-colband-size:0; mso-style-noshow:yes; mso-style-priority:99; mso-style-parent:""; mso-padding-alt:0cm 5.4pt 0cm 5.4pt;
